2021 ANNUAL PROJECT OVERVIEW

“B” Needed Surgery

29 May, 2021 in Kaeme by kaeme

Our team recently met a 6-year-old boy named “B.”

“B was born with **hypospadias**, and was abandoned by his family. He spent his first years of life in an orphanage. B was self-conscious about the physical difference between himself and other boys his age. This might have caused him to be a bit more reserved than his natural inclination. He didn’t appear to talk or smile very much. When our team met B and were alerted to his condition, he went to a specialist and we learned he needed surgery.

Kaeme staff accompanied B to a major medical center for the operation. On the first try, the poor little guy was put under, but an issue was discovered with the oxygen tank and the operation was aborted. Luckily, the next day everything went according to plan.

And B is a new boy! Bright, energetic and outgoing, he charmed the medical staff during his recovery. As soon as Ghana’s Adoption Steering Committee reconvenes, we hope they will be able to prioritize B and help him find a forever family.

Reminder that names and pictures are always changed to protect the privacy of these vulnerable children

WHAT WE DO?

What We Do

Kaeme works to place orphanage-housed children into a home, offering more children the chance to grow up in a loving family.

Building child profiles

Kaeme partners with the Department of Social Welfare (DSW) to canvas orphanages across Ghana, scouring records, talking with caregivers, and interviewing children to create a profile on the child's history, health, and family.

The information contained in these profiles allows the partners to thoughtfully match each child with an appropriate loving family. Our goal is always to reunite children with their own family members whenever possible.

Building families

Upon completion of profiling, Kaeme hosts a **Child Care Conference** with DSW social workers to create a care plan for each child. Placing each child with their own family members is a priority.

Kaeme staff conduct a **home assessment** to ensure that it is a safe, loving place. A staff psychologist works with the family and the child to prepare them for the transition. When the child is reintegrated with their family, a **community mentor** is also invited to assist the family with any minor difficulties.

They receive a **reunification package** (containing items such as a bed mattress, mosquito net, cooking oil, doll/soccer ball, and more) to ease the transition. If necessary, Kaeme provides tuition and/or nutritional support to the child and family.
